

Concrete Structures of the Midwest, Inc.

Project Fact Sheet

1000 West Adams

Developer:	Concord Development Corporation
General Contractor:	Concord Development Corporation
Architect:	Fitzgerald & Associates
Structural Engineer:	
Location:	1000 W. Adams Street Chicago, Illinois
Type of Structure:	Mid Rise Residential

1000 West Adams is a new type of residential development: Loft Style living units in a contemporary concrete structure. The structure features a masonry façade with a radial lobby entrance area, and exposed concrete balconies.

As is typical with most near west side projects, the tight jobsite required a detailed logistical plan to complete the building successfully. A mobile crane, which moved from wing to wing as the project progressed, allowed the movement of materials, equipment, and manpower throughout the project's duration.
