

Concrete Structures of the Midwest, Inc.

Project Profile

933 West Van Buren

Developer:	Concord Homes
General Contractor:	Concord Homes
Architect:	Hartshome & Plunkard, LTD
Structural Engineer:	Stearn Joglekar, LTD
Location:	933 W. Van Buren Chicago, Illinois
Type of Structure:	Mid Rise Residential

Concord's second project continued the development of "Loft Style Concrete." The tenth floor terraces feature exposed architectural concrete and isolated beams which continue the roof line above the terraces.

This 10 story structure was built around an existing eight story masonry building, and abutted the Eisenhower expressway. With careful logistical pre-planning, the concrete structure was completed on budget and within schedule constraints.
