

Concrete Structures of the Midwest, Inc.

Project Profile

City View Tower

Developer:	Kaiser Development , Inc.
General Contractor:	Pepper Construction, Inc.
Architect:	Nadel Architects, Inc.
Structural Engineer:	Thornton-Tomasetti, Inc.
Location:	720 West Randolph Street Chicago, Illinois
Type of Structure:	Mid Rise Residential

City View Tower is a 13 story residential/parking structure, with three levels of above grade parking and 10 levels of residential space. City View offers unobstructed views of Chicago's skyline.

Meeting the demanding schedule of this project required Concrete Structures to build the elevator core walls well in advance of the floor slabs. This sequence reduced the pour cycle duration, and allowed the completed structure to be delivered earlier than originally expected.
