

# Concrete Structures of the Midwest, Inc.

## Project Fact Sheet

### Midway Airport Parking Structure

Developer:	City of Chicago, Department of Aviation
General Contractor:	Concrete Structures/Bridgeport Steel Commercial Resources, Joint Venture
Architect:	A. Epstein & Sons, Int.
Structural Engineer:	A. Epstein & Sons, Int.
Location:	Midway Airport Chicago, Illinois
Type of Structure:	Parking Structure

As the general partner, Concrete Structures served as general contractor on this 3900 space parking structure. The design featured two helix ramps, access roads, and five levels of reinforced, post tensioned concrete slabs.

Concrete Structures demonstrated it's ability to perform within the tight schedule constraints of City of Chicago projects, delivering this facility on time and on budget.
