

Concrete Structures of the Midwest, Inc.

## *Project Information Sheet*

### *One South Dearborn* Chicago, Illinois

One South Dearborn is Chicago's latest skyline addition. This 40 story office tower is located at the busy intersection of Madison and Dearborn Streets, and its open air plaza will lighten up this once dark corner. The building features eight levels of heated parking and 32 levels of office space. A cast in place core and structural steel floor and vertical elements complete the structure.

Concrete Structures was subcontracted to complete the foundation, core walls and all concrete on metal deck floors. After foundation completion, a self climbing form system was used to achieve a three day floor to floor cycle on the core walls. All concrete activities are projected to be complete on time and within budget.
