

Concrete Structures of the Midwest, Inc.

Project Information Sheet

The Residences at Old Orchard Woods Skokie, Illinois

Scheduled to start construction in late 2004, Optima Old Orchard Woods will be the premier condominium address north of Chicago. This ambitious project will include three 20 story residential towers anchored by three levels of parking, retail and recreational spaces. Each structure is connected by multi-level "Skybridges," with residential units supported on tall columns. The courtyard will include a reflecting pool, enclosed with a one story colonnade.

Concrete Structures of the Midwest, Inc. will provide design/build services for the entire structure above caissons. The structures will be build to an ambitious schedule, allowing residents to occupy residential spaces by mid 2006.
